

DIGITAL SIGNAGE FOR AIRPORTS

Inform. Guide. Engage.

Deliver Better Passenger Experiences.

LiveSign's Android Media Player and CMS help airports deliver real-time information, streamline communication and enhance passenger satisfaction across every screen.

Real-time Anformation

Display live flight updates, alerts and announcements instantly.

Wayfinding & Navigation

Help travelers find their way with interactive maps and directional signage.

Passenger Engagement

Promote services, offers and airport facilities effectively.

Reliable & Secure

Enterprise-grade reliability, 24/7 performance and secure operations.

Centralized Control

Manage all screens and content from one powerful CMS platform.

Sustainable Solutions

Energy-efficient hardware and eco-friendly digital communication.

POWERFUL FEATURES. BUILT FOR AIRPORTS.

Live Flight Information

Integrate with FIDS systems to display live arrivals, departures, delays and gate changes.

Emergency Alerts

Broadcast important alerts and safety messages across all screens.

Dynamic Content

Display images, videos, animations, social feeds and more.

Multi-language Support

Communicate in multiple languages to serve a global audience.

Scheduled & Automated

Schedule content by time, date and location with ease.

Data & System Integrations

Integrate with AODB, FIDS, weather, CCTV and other systems.

Remote Management

Monitor, manage and control all screens remotely.

Scalable & Future-ready

Scalable solutions that grow with your airport's needs.
