

DIGITAL SIGNAGE FOR HEALTHCARE & HOSPITALS

Inform. Guide. Care.
Enhance Patient Experience.
Improve Operational Efficiency.

Live!Sign's Live Media Player and CMS empower healthcare providers to deliver the right information, at the right time, across every screen—improving communication, reducing perceived wait times, and elevating patient care.

Enhanced Patient Experience

Deliver timely, relevant information that informs, engages and reassures patients and visitors.

Reduce Perceived Wait Time

Entertain and inform patients with dynamic content and real-time updates.

Secure & Compliant

Enterprise-grade security with role-based access and data protection.

Centralized Control

Manage all screens and content from one powerful CMS platform.

Any Screen. Anywhere.

Deploy on TVs, video walls, kiosks, tablets and more across your facility.

Sustainable Solutions

Energy-efficient hardware and eco-friendly digital communication.

POWERFUL FEATURES. BUILT FOR HEALTHCARE.

Live Alerts & Notifications

Broadcast emergency alerts, health advisories and important announcements.

Data & System Integrations

Integrate with HIS, EMR, PMS, queue systems, APIs and other platforms.

Queue Management Integration

Integrate with queue systems to display real-time tokens, counters and wait times.

Scheduled & Automated

Automate content by time, date, department or event.

Dynamic Content

Display images, videos, health tips, doctor profiles, animations and more.

Real-time Updates

Update content instantly across one screen or thousands of displays.

Multi-language Support

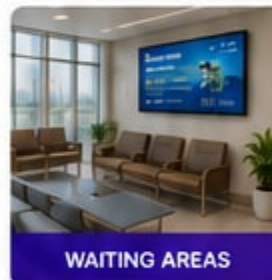

Communicate in multiple languages to serve a diverse patient population.

Remote Monitoring

Monitor device health, performance and content delivery remotely.
